

Congratulations - you've won!

Here's the treasure you've uncovered: a printable Pyramid Chamber room to let you play the game in the real world!

Just print out the picture and use your real LEGO bricks and Minifigures to build the puzzle. Slide each colored brick from its original space to the correct "X" mark without taking them off the paper or going through another brick. When they're all in the right places, you've won! Now you can draw in new squares and "X" marks to create your own all-new puzzles to solve!
